The Student Learning Outcomes for the course are the same regardless of modality or location.

**Course Outcomes
(WECM or LDACGM)**

- Apply the basic principles of radiographic image acquisition to image quality.
- Analyze the effects of exposure variables upon image quality.

The following general education course competencies (TGE) or Marketable SCAN Skills (CTE/NAH) are addressed in this course: General education course competencies (TGE) or Marketable SCAN Skills (CTE/NAH) assessed are indicated with an asterisk *.

- Analyzes images to determine the use of appropriate imaging parameters.
- Develops, maintains and makes available optimal exposure technique guidelines for all radiographic and fluoroscopic equipment.
- Verifies that exposure indicator data for digital radiographic systems has not been altered or modified and is included in the DICOM header and on images exported to media.
- Performs ongoing quality assurance activities and quality control testing.
- Uses accessory equipment.
- Evaluates images for optimal demonstration of anatomy of interest.
- Evaluates the patient, equipment and procedure to identify variances that might affect the expected outcome.

The following program student learning outcome are assessed for this course:

1. Students will produce diagnostic radiographs.
2. Students will provide safe, reliable patient care.
3. Students practice critical thinking in clinical setting.
4. Students utilize critical thinking skills in traumatic situations.

Evaluation Methods:

Unit exams, quizzes, chapter assignments, online learning assignments

Course Grading: Please see individualized instructor policies for course evaluation methods. Students will be assessed on the same measure across each discipline as per CBC guidelines.

Major Course Assignments and/or exams counting for at least 10% of a final course grade:
